

# THE NEW Duo<sup>2</sup>. BUILT ON YOUR NEEDS.

 Stoneridge | SE5000 Exakt Duo<sup>2</sup>

## DUO TECHNOLOGY

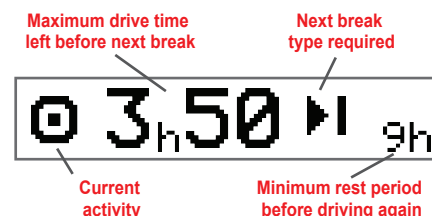

The new SE5000 Exakt Duo<sup>2</sup> is the smartest One Minute Rule tachograph yet! It comes as standard with our tried and tested Duo Technology, the decision support tool that gives drivers real-time updates on driving and rest time, enabling them to easily keep track of their journey whilst optimising their time on the road and helping them to stay legal\*. The Duo Technology has now been enhanced with Working Time Directive calculations and Ferry & Train support.

### Time Left to Drive

The **Time Left to Drive** display takes into account continuous drive time (4hrs30), daily drive time (9 or 10hrs), weekly drive time (56hrs) and fortnightly drive time (90hrs).

There are 3 hours 50 minutes of drive time (current activity) remaining before the driver must stop to take a rest of 9 hours.

### Example Duo screens

### Time Left to Rest

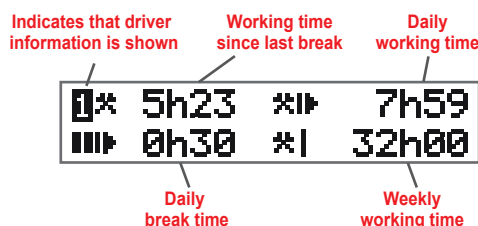

The **Time Left to Rest** display takes into account breaks (45mins or 15+30mins), daily rest (9, 11 or 3+9hrs) and weekly rest (45 or 24hrs).

The driver must rest (current activity) for a further 45 minutes before being able to drive for 4 hours 30 minutes.

### Working Time Calculations

The **Working Time** display takes into account Working Time Directive calculations and gives an overview of **working time since last break**, **daily working and break times** and **weekly working time** to keep drivers more informed.

### Warnings

 end of daily drive

**Warnings and Pre-Warnings** provide the driver with important drive and rest information, e.g. Maximum daily drive time, Start of daily/weekly rest periods etc.

\* Provides a guide according to 561/2006 & 2002/15/EC.

Larger symbols at activity change - only shows the actual activity at change

Set default to 'Rest' on key off using company card

Automatic adjustment for Daylight Saving

Easy paper roll loading system

Lifetime internal battery - no battery change required

2-year unlimited mileage warranty

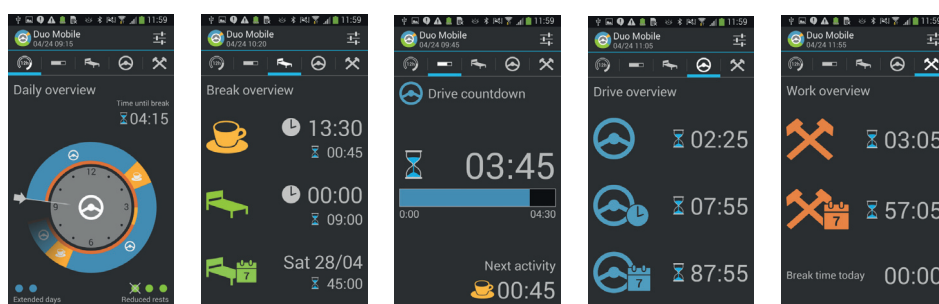

## HANDY APPS FOR YOUR PHONE

To make life even easier for fleets we have created two free Android apps.

**Duo Mobile** delivers all the benefits of Duo technology on your phone. With this intuitive app installed, your phone syncs with the SE5000 Exakt Duo or Duo<sup>2</sup>, giving you a second Duo display. That means you get real-time updates - including drive and rest time countdowns, as well as handy warnings to help keep you legal - on your phone screen.

**Tacho Center** enables you to manage all your tachograph data wirelessly. That means you can download driver card and vehicle unit data to your phone without all the hassle of attaching wires or download equipment. What's more, Tacho Center tells you exactly when you last downloaded data for a particular driver or vehicle, so you can continue to manage your fleet effectively. And, once information has been transferred to your phone, you can then email it to any computer so it's safely stored, or send it straight to your OPTAC analysis software.

To use our free apps, you will need to purchase a Tacho Link dongle to enable your digital tachograph to connect with your Android phone via a Bluetooth connection. Tacho Link also comes with a modified SE5000 digital tachograph printer cassette to allow insertion of the dongle into any Stoneridge digital tachograph without the removal of the printer cassette.

For further information on the SE5000 Exakt Duo<sup>2</sup> digital tachograph call us on 01382 866 356 or email [SE5000UK@stoneridge.com](mailto:SE5000UK@stoneridge.com)
